

Q33. FAQs concerning Border Measures and Quarantine Requirements

Updated: November 14, 2022

Q1. What are the entry procedures and quarantine requirements for travelers coming to Taiwan?

A1.

1. Please refer to the "Instructions for passengers before arriving in Taiwan and clearance at the airport" (<https://reurl.cc/LXXnoe>).
2. Effective October 13, 2022, arriving travelers will no longer be required to quarantine and will instead undergo a seven-day period of self-initiated prevention after arrival.

Therefore, travelers will no longer be required to :

- (1) Make a health declaration on the Quarantine System for Entry before arrival.
- (2) Have a mobile phone with a Taiwanese number.

Also, COVID-19 Health Declaration and Home Quarantine Notices will no longer be issued to travelers.

3. Arriving travelers should walk through Taiwan CDC fever screening stations:

- ◆ Travelers who do not have fever/ upper respiratory symptoms or pass through infrared fever scanners without elevated temperatures detected should proceed to clear customs and complete entry procedures and then take public transportation, a quarantine vehicle (a quarantine taxi, or ride from their friends, relatives, companies or

organizations), compliant with epidemic prevention protocols, or drive themselves to their residences; travelers should follow related epidemic prevention rules after arriving at their residences.

- ◆ If you have experienced any discomfort or symptoms in the 14 days before entry or upon entry, you should truthfully notify Taiwan CDC quarantine personnel of discomfort or symptoms at the airport or port after arrival; you should also take a deep-throat saliva test at a designated location in the airport/port of entry. For details about the specimen collection process, please visit <https://reurl.cc/Lba77X> or view the picture below. After taking the saliva test, a quarantine vehicle will be arranged for you, and you should ride in that vehicle to go to the place you choose to undergo self-initiated prevention.

◆ Four rapid test kits will be given to passengers at international airports/ports upon arrival. Arrivals have to use the test kits :

1. On the day of arrival or the first day of the self-initiated prevention period (D0/D1).
2. Before going out during the self-initiated prevention period (a negative result within two days is required).
3. When symptoms develop during the self-initiated epidemic prevention period.

Q1-1 What requirements must confirmed cases or previously infected individuals meet before taking a flight to Taiwan?

A1-1. Effective on November 14, 2022, travelers who test positive abroad

are required to wait over five days from their specimen collection date before taking a flight to Taiwan in order to prevent cross-border transmission of the disease.

Q1-2 What requirements are there for proof of COVID-19 vaccination to enter Taiwan?

A1-2. Travelers coming to Taiwan don't have to provide proof of COVID-19 vaccination. However, those who obtain entry permission under government agencies' special programs approved by the CECC should follow the relevant entry requirements of their special programs. If you plan to apply for or have obtained entry permission under a special program, please contact the government agency responsible for that special program for entry requirements.

Q3. For what purposes may non-R.O.C. nationals apply to enter Taiwan?

A3. Please refer to the "Restrictions on Entering Taiwan" on the website of the National Immigration Agency of the Ministry of the Interior (<https://reurl.cc/91v1p8>) for a list of persons allowed entry into Taiwan.
